Cybereason and GuardSight

MANAGED SECURITY OPERATIONS AND INCIDENT RESPONSE (IR) FOR ANY SIZE ORGANIZATION

CYBEREASON AND GUARDSIGHT

As workspaces continue to evolve, organizations are faced with the challenge of building, managing and maintaining a security solution that will stand up against today's advanced attacks. Organizations, however, are not the only ones evolving. Adversaries are constantly developing new tactics, techniques and procedures (TTPs) designed specifically to infiltrate a network and carry out an attack.

Maintaining a mature security posture to combat these advanced threats can be expensive and time consuming, while finding the right resources and staff can prove even more difficult.

OUR APPROACH

GuardSight and Cybereason work together to deliver a robust managed security operations solution that pairs the Cybereason Defense Platform with some of the most advanced security experts in the industry. GuardSight and Cybereason provide managed endpoint detection and response (M-EDR), NGAV, vulnerability management and incident response that can scale to the needs of any size organization.

BENEFITS

- Detect, triage and remediate threats before a breach can occur

- Around-the-clock network security

- Proactive assessments help uncover vulnerabilities and improve security posture

- Incident response delivered with speed and efficacy, saving time and money

- Help meet compliance requirements across several verticals

SOLUTIONS & DELIVERED OUTCOMES

SOLUTION	DELIVERED OUTCOME
Managed Endpoint Detection and Response (MDR)	GuardSight security experts and global SOCs leverage the Cybereason Defense Platform to detect, triage and remediate malicious operations (MalOps), delivering advanced endpoint protection every minute of every day.
Vulnerability Management	GuardSight and Cybereason work together to conduct a variety of proactive services and assessments to help organizations discover network vulnerabilities and improve their security posture.
Incident Response	Leveraging the Cybereason Defense Platform, GuardSight incident responders will work with an organization to detect and remediate all instances of a cyber attack, quickly and efficiently.

GUARDSIGHT + CYBEREASON USE CASES

Addressing the Security Labor Shortage	**The Challenge:** Hiring, training, and maintaining a skilled security team is a challenge for organizations of all sizes. New employees are expensive to hire and train, and in the event that a member of the security team leaves, organizations are often left short-handed with the need to start the process all over again.
	Solution: GuardSight and Cybereason offer a MDR solution managed by GuardSight's SOCs and expert threat hunters, that will detect, triage and respond to threats on behalf of the customer, eliminating the need to repetitively hire and train staff.
	Result: As a result, organizations will have confidence that their networks are secured around the clock, by expert threat hunters and responders.
Improving Security Maturity	**The Challenge:** Legacy tools, disparate networks and an ever-growing number of endpoints can leave organizations vulnerable to an attack.
	Solution: GuardSight and Cybereason work together to offer a number of proactive services specifically designed to fit the needs of each organization.
	Result: Proactive services and security assessments will help organizations gain an understand of their existing security maturity, uncover network vulnerabilities and provide actionable recommendations on how to harden their security posture.
Expensive and Slow Incident Response	**Challenge:** Legacy IR tools and techniques often result in long engagement times as a result of manual processes and outdated data correlation tactics. costing organizations time and money.
	Solution: GuardSigh's incident responders leverage the Cybereason Defense Platform and forensic tools to automate these collection times and uncover historical artifacts to gain visibility and context of the entire attack.
	Result: The combination of GuardSight incident responders and Cybereason tools result reduced time to remediation, saving time and money.

GUARDSIGHT AND CYBEREASON WILL HELP IMPROVE NETWORK SECURITY BY

- Identifying the needs and objectives of each organization, then define the strategy and process to deliver actionable results
- Deploying, implementing and managing security operations and vulnerability management tools.
- Delivering measurable results and KPIs for proven effectiveness.
- Continuously optimizing and tuning existing policies to deliver a mature security infrastructure.

ABOUT GUARDSIGHT

Since 2009, GuardSight provides specialized Cybersecurity as a Service protection packages for organizations alongside white-glove service for smart tactical cyber defense. Across industries, we help small businesses to Fortune 500 global enterprises manage their cybersecurity operations (SECOPS), vulnerability management (VULN), and incident response (CIRT). GuardSight's cyberwarriors bring world-class expertise and services to improve your cybersecurity posture to reduce risk.
